

Senior BMS Project Manager

Our client is looking for a full time Senior Project Manager to manage specialist Building Management Systems and Controls on projects in the Midlands and the South West.

Our Client

- Our client is part of one of the UK's leading contractors and offers specialists installations including BMS, Security, Fire and Data installations.
- They enjoy a consistent stream of work all over the UK including some large flagship projects.

The Role

- As the Senior Project Manager, you will be responsible for managing BMS projects of varying sizes, initially in the Midlands and South West.
- A variety of projects are carried out from new builds to fit outs, large and small.
- You will be ultimately responsible for ensuring projects are delivered on time, on budget and leaving a satisfied customer.

Responsibilities

- Provide direction, control and implementation of projects to a high standard.
- Be responsible for the commercial performance of the project including the preparation and submission of payment applications, preparation and submission of variations, and agreement of the same.
- Interpret and understand the scope of works from sales handover to filter through to the necessary project support team.
- Overall responsibility for health and safety management on all managed projects.
- Monitor, review and report on the progress of all projects, progress, delays and resourcing amendments to the customer, Operations Manager, and other support staff as necessary.
- Manage the appropriate purchase and sub-contract orders as required on the projects.
- Ensure standard documents are continually used and maintained. These include but are not restricted to progress schedules, technical submittals, RFI's, etc.
- Ensure customer satisfaction is maintained.
- To undertake any other duties as requested by senior staff.
- Liaise with Operations Manager, Project Engineers and other staff as required to carry out this role.

Relevant Experience, Skills and Knowledge

- **Essential**
 - o Ability to use Microsoft Excel and Word
 - o Minimum 3 years experience of project management in the construction industry with experience in BMS and controls systems
 - o Experience in producing and managing a programme of works
 - o Experience of managing health and safety in a construction environment
- **Desirable**
